

Technical Data Sheet

CaSoPaL® clean Disinfectant

Product Features

CaSoPaL® clean consists of a synergistic mixture of ethanol, iso-propanol and water and is used to disinfect surfaces of mortars, renders, plastics, coatings, tiles and glass as well as wood, wallpapers and loose dust. **CaSoPaL® clean** can be processed by spraying or brushing, also wiping with a cloth or sponge saturated with **CaSoPaL® clean** is possible. Disinfection is achieved within few minutes. **CaSoPaL® clean** is a ready to use disinfectant.

Application instructions

Successful removal of microbiological growth requires complete elimination of the source. The earlier mould, algae or other biological growth is removed, the easier is it to keep it under control. When mould, for example, is found on wallpapers or loose paint layers, it can be expected that the source is much greater than visible. It is necessary to remove the wallpaper and loose layers - but without contaminating surrounding areas. This can be achieved by applying **CaSoPaL® clean**, which kills bacteria, viruses, fungi and algae. The infected areas have to be fully saturated. Wallpapers and loose layers or dust can be removed after evaporation of the alcohols, they should be given into plastic bags which are tightly to close. Open the windows during application and follow the safety instruction given below.

When biological growth is removed from render or painted surfaces, it is recommended to treat the areas in a second step with **CaSoPaL® lime paint »Classic«**, which creates a high pH coating, stopping new mildew, algae or other biological growth.

Provide appropriate protection for surfaces which are not to be coated! Remove splashes with water!

Packaging / Storage

CaSoPaL® clean is available in 500 mL spray flasks and 0.5 Liter, 1 Liter, 5 Liter and 10 L containers. Storable for at least 5 years in closed original containers. Keep away from moisture and air. **CaSoPaL® clean** has to be stored between + 5 °C and +30 °C.

Safety

CaSoPaL® clean is flammable/combustible. Keep away from oxidizers, heat, sparks and flames. Avoid spilling, skin and eye contact. Use face mask, protective gloves and safety goggles. Spraying may produce aerosols which can be dangerous and harmful to health. Ventilate well, avoid breathing vapors. Open the windows. Keep the containers tightly close. Keep out of reach of children. Follow the instructions given in our Material Safety Data Sheet.
